DOCUMENT DUE DILIGENCE

SECURE PLANT VS MOBILE TRUCK SERVICES

According to NAID, the National Association for Information Destruction, there is no security difference between mobile truck and secure plant shredding operations. As confirmation of this fact, a well-known mobile shredding company was purchased in 2015 for \$2.3 billion in cash and the new owner promptly announced the decision to convert all their mobile shredding customers to plant-based service.

Cosmo Shred is operated by a local non-profit. We have earned the gold standard in document destruction accreditation. Also, shredding your documents is a perfect fit for persons with limited literacy skills. Help us create a more inclusive community.
